# CELL WORK

---

## FACS without staining

---

1. Cell harvest : suspension form- collect all, and cell down (eg. 1200 rpm 5min) | adherent form - remove the media, PBS washing, and then trypsinize and cell down
2. Wash using PBS
3. Resuspend them into PBS (around 500 ul)
4. Transfer them into FACS tube (filter through nylon)
5. Stand on ice
6. Go to FACS
